THE FACTORY BELL.

Chime—chime—chime!
Chime for the work that is in it done;
Chime for the work that is yet to come.
The bell tolls, and a softer tone
Now comes from all but the wheel alone.
That rattles on with a ceaseless hum,
Over the laughter of girls and boys,
Over the humming of lovers' notes,
And mothers' lullabies, loud it floats.
Busy yourselves! for the day goes by—
Work while you may, ere the eve dawns night!
The light will fade that is shining now;
The faintest pale from each cheek and brow.
Now to the task, in thy golden prime,
Ere changed is the soft-toned, cheerful chime;
Stay not a moment, for though the night
The night is coming, and the light is dim;
But far above where the light is heard
Shall Father Time, who says not a word,
But chime—chime—chime!

Ring—ring—ring!
Ring in the day for the work to begin,
Ring in the morn as the light pours in;
The first bright beam of the rising sun,
Herald the day that has just begun.
Bustle—bustle—work is no play,
All must be done ere the close of the day—
Come, maiden, hasten, stay not behind!
Come, youth, delay not, hasten ere night!
The ceaseless whir of the factory wheel,
Circles around and its sound is heard
Far to the East and far to the West,
Where spreading lines of the sunbeams rest;
Moments are precious—hours are few—
Gather the work for the day's end now.
The bell shall toll to honor the one
Who fails not till the day is done.
But Father Time, the beltry within,
Pulling the rope, heads never the dim—
But rings—rings—rings!

Toll—toll, toll!
Toll—for the work that is at its close,
Toll—for the lines that their labor have run,
Toll—for the youth in his faded bloom,
Toll—for the maid in her early tomb,
Toll—for the loss of the vanished light,
Toll—for the entrance of Death and Night,
Toll for the work that will turn no more,
Toll for the work on another shore!
For the wheel was Life, and it now is naught—
Its labor is ended, its lesson is taught.
Toll for the ringing that Father Time
Changed to a soft-toned, cheerful chime;
Toll for the chime that in mountain toll
Was changed from a chime to a solemn toll.
Old Father Time, with his iron face,
Heads never a sound in his lonely place—
But tolls—tolls—tolls.

SOME SINGULAR STORIES.

STRANGE INSTANCES OF MISDEADEN TESTIMONY—THE DANGER OF CIR- CUMSTANTIAL EVIDENCE.

Mr. David Graham Addie, in the
Washington *Republic*, gives some inter-
esting instances of the misleading char-
acter of circumstantial evidence. In
1642 an inn-keeper named Yant, named
Harris, was hanged on a charge of mur-
dering a man named Gray. A hostler
named Morgan charged him with crime,
and a maid servant swore that the morn-
ing after Gray's death she saw Harris
bury gold in his back. Search was made
and \$300 were found in the place de-
scribed. Harris was condemned, the
jury deliberating but two minutes, and
did protesting his innocence. Years
after, the maid servant having become
Morgan's mistress, they quarrelled,
when she confessed that her lover, hav-
ing had a grudge against Harris, they
swore the crime on him though no mur-
der was committed at all. Morgan found
that Gray had died of apoplexy, and
they having seen Harris bury his own
money, they took this diabolical revenge.
The two were cast into prison, and would
have been executed if they had not been
cleared off by malignant disease.

In 1743 a gentleman on his way to Hull
was robbed by a highwayman. He
stopped at the next inn, and in describ-
ing his loss stated he always carried his
coins. Shortly after returning to a private
place, he was visited on by the landlord,
who informed him he had heard of his
(the traveler's) adventure, asked the time
of the robbery, and said he suspected his
hostler, who of late had had plenty of
money. Continuing he said that shortly
before he had sent the hostler to change
a guinea, who returned after dark, saying
he could not change it. The landlord
noticed the coin was not in his pocket,
and before he heard of the robbery he
had paid it to a countryman. He sug-
gested that the hostler who was asleep
under the influence of liquor be searched,
which being done, the guinea was found
in his pockets. He was tried and hanged,
and years afterward the landlord, being
at the point of death, confessed he had
paid out one of the coins before find-
ing they were marked he took advantage
of an errand he had sent the hostler on,
and his drunken condition to place the
marked coins in his pocket, and the evi-
dence of the countryman handed him.
The case of the innkeeper at Oxford-
shire, Jonathan Bradford, has often been
told. Late one night two guests heard
deep groans proceeding from an adjoin-
ing apartment, and, repining there,
Bradford, with a long knife in his hand,
standing over the body of a guest named
Hayes, who, earlier in the evening, had
admitted that he had a large sum of
money in his possession. Bradford shortly
maintained his innocence, claiming he
had been attracted by the groans of the
victim, and had just drawn the knife
from the wounds when the other guests
arrived. The evidence, however, was so
strong against him, and he was hanged.
The real facts of the crime did not come
to light for some years, but that Bradford
was not innocent of the intent, if of the
deed (over and over). The murder had been
perpetrated by Mr. Hayes's own footman,
who, knowing that his master had a large
amount of money with him, determined
upon his death and robbery. Going to
his room, therefore, he had stabbed him
with his saddle-bags, and made his way
in safety to his own apartment, only as
it must have been, ten seconds before the
innkeeper himself arrived upon the
scene. He had been strange to relate,
Bradford left a confession, which had
been kept secret, that, although innocent
of the murder, he had stolen to the room
of his guest with the mind of effecting
his death. He had been heard to say
of his money at supper, had deliberately
planned to kill and rob him, and was
stricken with amazement when he found
that the deed had already been done.
He had been anticipated by but a few
minutes in the execution of his murder-
ous design.

In Edinburgh, in the year 1721, lived
William Shaw, an upholsterer, with an
only daughter, Catharine, who was a
girl who was to be married to one John
Lawson, a jeweler, toward whom her father
bore the hearty, honest aversion known
as "Scotch hate." John had been wild
and the lesser, but "Scotch Soother,"
to one since his engagement to Cath-
arine Shaw. Old Shaw had sworn that
Lawson should never enter his family,
and with violence forbade him to come
near the house. There was the son of a

FARM NOTES AND HINTS.

RAISING PORK.—It is not necessary,
nor is it advisable, to keep hogs very fat
during warm weather. They will keep
themselves in good condition, and will
grow rapidly and healthily, and no
supper should be fed them. They should
be kept in this condition they will
go into the fattening pen in the fall
with sound teeth, good appetites, and
healthy digestive organs. All kinds of
interior and broken grain, such as bar-
ley, rye, and wheat, may be fed with
benefit to growing hogs, and toward fall
the quantity may be increased with the
addition of peas and various kinds of
beans. We know many good farmers
who never think of feeding a pound of
corn to their hogs until the close of the
season, or a month or two before killing.
Bar, shorts, soaked peas, and corn
are used instead of a little extra weight
given only to the hogs. They are fed
good and firmness and solidity to the
pork. Our Eastern farmers can make
pork cheaper on other kinds of food than
corn, and will venture to say it is as
good an article, and when the pork is
able to digest the corn, when the pork is
placed exclusively from corn, as is
done in many of the Western States.

FARM HIRE.—A farmer not long ago
remarked that on a large farm he hired
three men by the month, paying respect-
ively \$45, \$30, and \$20. All expected
himself, while the others boarded in the
family of the farmer. The highest-
priced laborer was most profitable, and
the fifteen-dollar man, who had been
paid small wages, the latter did his best
not to earn more than his board. If the
farmers had not a good deal of work that
a poor hand could do nearly as well as a
good one he could not afford to keep the
inferior laborer at any price.

PANTRY TREASURES.—Twenty-five and thirty-
years ago, guided by what seemed to be
a general opinion among tree-planters
that the dwarf should not be planted
deep lest the pear strike its roots into
the ground and the standard trees
raised the lower part of the pear not
deeper than the surface of the ground
and raised the earth two inches higher—
and not over 1 per cent. of them have
formed pear roots. I would not risk my
apple trees, but I do not do well with
half standard, as I would thereby get the
advantage of the early bearing of the
dwarf and of the greater size of the half
standard. —O. B. CURTIS.

COFFEE BEANS TO ORDER.

Moulded from Dough, and then Hardened,
Baked and Browned.

"Give me your opinion of these,
young man," said the east-side grocer,
as he spread before the reporter a hand-
ful of coffee beans. "They aren't very
regular in size, are they? Now compare
them with the finest you can find, and
tell me the better."

The grocer placed a second handful
alongside of the others. The two lots
were of the same dark brown color, and
at a very little distance away presented
no very marked difference. Closer in-
spection showed that while the coffee
beans first shown were not all of the
same size, the second handful were of
extraordinary regularity, the beans be-
ing plump and large.

"I know what you are going to tell
me, and at first glance any one would
say so. Your opinion is that the last
lot is the best, isn't it? Well, the
difference between the two is that these
are a fair lot of coffee beans, while the
others aren't coffee at all, and never
grew on a coffee bush."

"What kind of a bush did they grow
on?"

"No bush at all. They are a manu-
factured article. You need not look as
if you didn't believe it, for it's a fact on
which you may satisfy your own mind.
These are taken from the stomachs of
men, imitations, made out of dough and
browned up to resemble the true coffee.
They are made in molds and baked
afterward. Each one is almost perfect
in shape, and the color is more like
that of genuine coffee beans to have such
regularity."

"They look all right, but it strikes me
that no one would mistake the beverage
made from this for the real thing. You
say these are wrong again, young man.
No respectable grocer would be foolish
enough to give any customer who buys
a pound of coffee a pound of the imita-
tion. No, indeed. They are made in
one of two ways, or five of coffee to
one of the imitation. Nobody examines
of bad coffee all the time. 'I'm
sorry I can't tell you it is,' says the
grocer, 'I buy the coffee in the
bean and grind it myself. I am sure it
is not adulterated.'"

"You see, the grocer can mix chaff
with ground coffee, but when coffee is
ground, the chaff is gone, and the coffee
is pure. Come, brilliant mind got to
the difficulty by making coffee beans to
order." —N. Y. SUN.

How Colds are Taken.

A person in good health, with fair
play, says *The Lancet*, easily resists
cold. But when the health flags a little,
and the nervous system is a little less
taken, and according to the weak spot of
the individual, assumes the form of a
cold, or pneumonia, or it may be, jaun-
diced. Oil of cod liver is the best remedy
for the one of the most efficient. A
long day's work, a growing youth, losing
two hours' sleep over evening parties two
or three times a week, or a young lady
fatigue in "going the season," young chil-
dren over-fed and with a short allowance
of sleep, are common instances of the
victims of "cold." Luxury is favorable
to chills-taking, very hot rooms, soft
beds, feather beds, create a sensitiv-
ness that leads to catarrhs. It is not,
after all, the "cold" that is so much to
be feared as the antecedent conditions
that give the attack a chance of doing
harm. Some of the worst "colds" hap-
pen to those who do not leave their house
or even their bed, and those who are
most invulnerable are often those who
are most exposed to changes of tempera-
ture, and who by good sleep, cold bath-
ing, and regular habits preserve the tone
of their nervous system and circulation.
Probably many chills are contracted at
night or at the end of the day, and
the cold is not always done in a single
moment. The cold is not always done in a
single moment. The cold is not always done
